

MUELLER® Mini-BAND™ Clamp 1/2"-4"

Keyhole application/360° uniform seal

The Mueller 230 Series Mini-Band Clamp is an ideal solution for sealing pinholes, punctures, splits and small abrasions on 1/2"-4" steel pipe. Its compact design allows repair in tight conditions and is very well suited for keyhole installations. It can also be used to mark the location on polyethylene pipe where a squeeze-off has been performed.

Compact size and "clamshell" design is ideal for use with keyhole tooling, shown here.

An ideal way to ensure the damaged area is completely sealed is to use the Mueller full-encirclement Mini-BAND Clamp. This clamp fully encircles the damaged area of pipe with a one-piece rubber gasket that includes integral stainless steel gap bridges recessed and bonded in place. A stainless steel band with drop-in style ductile iron lugs is placed around the gasket assembly. This secures the gasket and ensures a uniform sealing force around the entire circumference of the pipe.

The Mini-BAND Clamp is available with zinc-plated steel

or stainless steel bolts and nuts.

For more information about the Mueller Mini-BAND Clamp, contact your authorized Mueller Gas Products Distributor or the Mueller Gas Division Customer Service Center at 800-798-3131.

Note: Gasket is shown in proper alignment with stainless steel band.

Position the Mini-BAND insert as shown.

With lugs centered over one of the gap bridges.

Drop in the bolt and tighten.

Mueller® MINI-Band™ Clamp Dimensions

ZINC-PLATED STEEL BOLT

Catalog #	Nominal Pipe Size	O.D. (inches)	Width (inches)
230-03-0063	1/2"	0.63	3
